

SUSTAINABILITY POLICY

CCN Group Sustainability Policy; Harmonizing our corporate values, basic working principles and ethical approach, as well as our performance in economic, environmental, social and governance areas with global goals, directs our basic approach towards our priority issues.

Our main goal is to keep up our sustainability priorities, which we manage in line with our policy, and our contribution to the United Nations Sustainable Development Goals with all our stakeholders. Our Sustainability Policy consists of three main focus areas;

First “Do something for the world!”

- Ensuring effective and efficient use of resources,
- Investing in new technologies to increase renewable energy capacity and efficiency,
- To develop solutions for energy efficiency and to create the necessary infrastructure,
- To support the use of renewable energy sources in energy consumption,
- To develop and support projects that will ensure the efficient use of water resources and raise awareness on this issue,
- To comply with Zero Emission and Zero Waste targets,

Second focus area “Human Only”

- To realize high-impact social projects that contribute to social development and permanent solutions to social problems,
- To ensure that public health is observed by evaluating the environmental and social effects of our activities,
- To increase employee loyalty and welfare to create a working environment where they can develop themselves and work safely,
- To preventing all kinds of discrimination in working environments and accordingly employment, career management, remuneration, performance evaluation, etc. to ensure equal rights in matters,
- Believing in the power of women, supporting the development of women's employment and their qualified active participation at all levels of the working environment,

Third Focus area “Operational Excellence”

- To comply with business ethics rules and corporate governance principles in business processes,
- To develop collaborations for promote the United Nations Sustainable Development Goals
- To fight against bribery and corruption and to encourage our stakeholders in this subject,
- To implement our sustainability understanding with responsible supply chain practices and add value to our suppliers,
- To provide differentiated services and solutions to our stakeholders by evaluating developing technology and digital elements.

We undertake that this policy will be communicated to all stakeholders and ensured that they are understood. This policy also establishes a framework for targets and is constantly reviewed.
